About

EnjoyQuizMaster Q10 Interactive system supports the follow Office version:
Office 2007
Office 2010 32/64bit
Office 2013 32/64bit
Office 2016 32/64bit
Office 365 32/64bit

Required configuration environment:
Operating system: Windows 7 or higher 32/64bit

Start program

There are 2 ways to start the software. The first one is to start by clicking the red “EnjoyQuizMaster Q10” icon in the desktop or program directory, or click the PowerPoint file to start. After startup successfully, you can find a tab called Enjoy Tech in PowerPoint.

Overview for each module

Start:

Preparation before the event

PPT Edit:

Setting and modify for quiz

Special Slide Set:

Advanced display effects settings

Settings:

Software settings, including creating deleting editing the classes, students ,teachers,

subject, database backup and restore settings and so on

Query:

Query and export saved records

Hardware Settings:

Select the proper hardware type, run simple test for hardware, and set Remote ID

About:

Information about the software

Start activity

After clicking the "Start button, the main window and People setting window will show up Each setting in staff selection window from top to bottom is:

Class:

Select Class

Number of People:

Set the number of people (only for Temporary class)

Teacher:

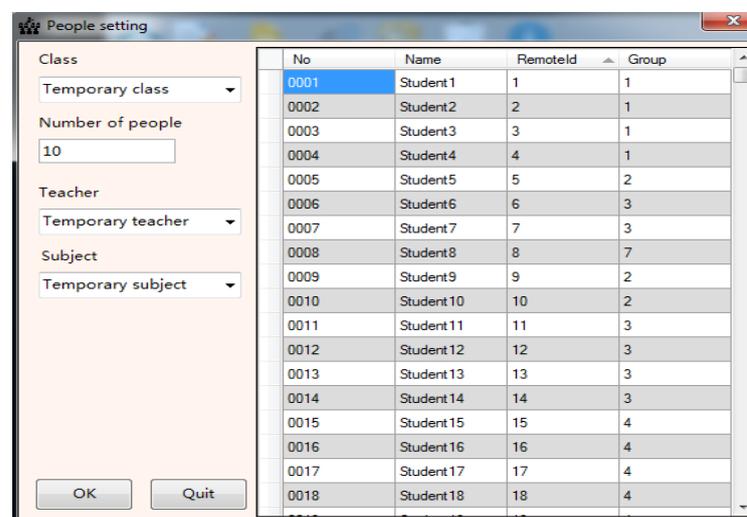

Select Teacher

Subject:

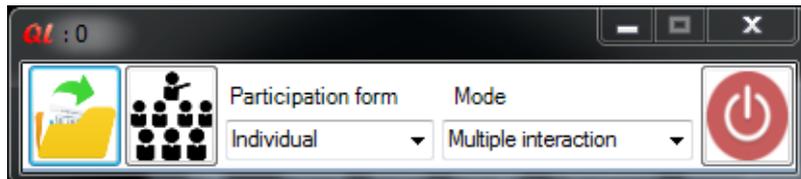

Select Subject

Disable buzzer's speaker:

Enable or disable speaker(only or RF215 Buzzer)

Before clicking OK, make sure the receiver has connected to your computer.

In the main window, the order from left to right is:

Open PowerPoint file

People setting

Participation form:

with Individual and Group option

Mode:

When the window displays, it can read the current PowerPoint file's interactive mode automatically. you can click the drop down box to change the mode temporarily.

Start:

Click this button or press the Power button on the teacher's remote to start the event. Before starting. Please make sure that the staff has been set, otherwise you will not be able to start the event

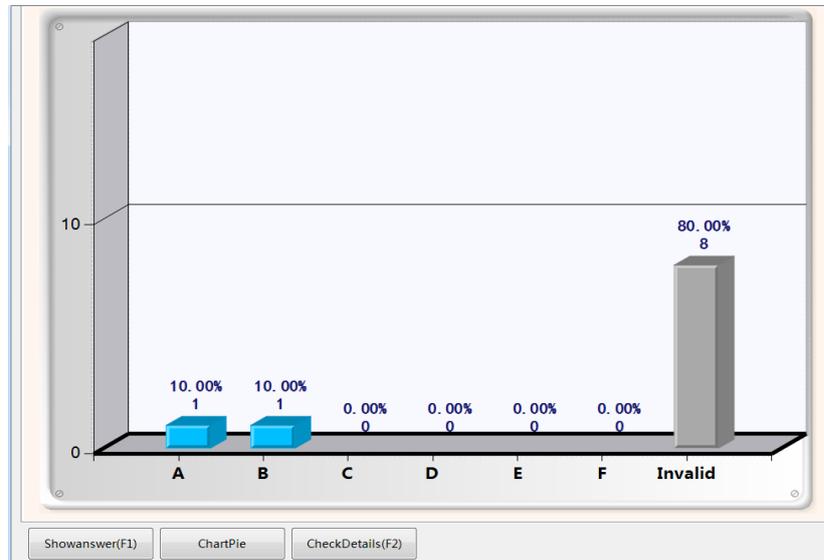

During the event

After entering the event, at the top of the screen are the countdown box, the ID panel, at the bottom of the screen is the status bar.

PPT Edit

The top buttons from left to right are:

First Page:

Jump to the First slide

Previous Page:

Move to Previous slide

Next Page:

Move to Next slide

Last Page:

Jump to the Last slide

New PPT:

Create a PowerPoint file with blank slide

New Quiz:

Create a blank slide on current PowerPoint file

Delete Quiz:

Delete current slide

Copy Quiz:

Copy current slide

Save PPT:

Save current PowerPoint file

** The above operations can also be completed in PowerPoint**

PPT info:

Statistics information about the current PowerPoint

Use Template:

Use Pre-set template page

The settings from the top to the bottom of the left part of the window are:

PPT Mode: Set the mode of the file, with these following options:

- NormalQuiz,
- Rushgame,
- Elimination match,
- Handrise,
- Vote/Survey,
- Judge,
- Random call,
- Multiple interaction

Quiz Mode: Set current slide's mode (only for Multiple interaction), with these following options:

- NormalQuiz,
- Handrise,
- Random call,
- Rushgame

Difficulty:

with EASY,NORMAL,HARD option

Quiz Time:

Time of the Quiz, Valid value 0~9999

Answer Time:

Time of answering the question in rush mode. Valid value 0~9999

Mark:

Score for right answer, Valid value 0~9999

Deduct:

Score for wrong answer in Rush and HandRise, Valid value 0~9999

Valid Option:

set the range of answer selection (only for single and multiple)

Apply to all:

If you want to apply the above settings to each page, click this button.

The middle part is for editing the quiz title and options. Hove mouse on the button of the title and option, a tip message will show up.

Following the Tips below can effectively speed up the editing action

Click Mouse 1 to get selected text in PowerPoint

Click Mouse 2 to clear TextBox

Hold Shift and Mouse 1 or click mouse 3 to create a textbox

Hold ctrl and Mouse 1 to set column color

Below is the setting of the question type and answer. Different types of devices support different types of questions.

The software currently supports these type of questions:

Single:

There is only one correct answer in the given option

Mutiple(Uncertain answers):

One or more correct answers in a given option

Mutiple(Certain answers):

The number of correct answers in a given option is known, it will also display on the upper right corner of the clicker's display panel.Only for 219

Number:

Enter number to answer

Text:

Enter String Text to answer

Classify:

Classify according to given information

Sort:

Sort by given information

Vote:

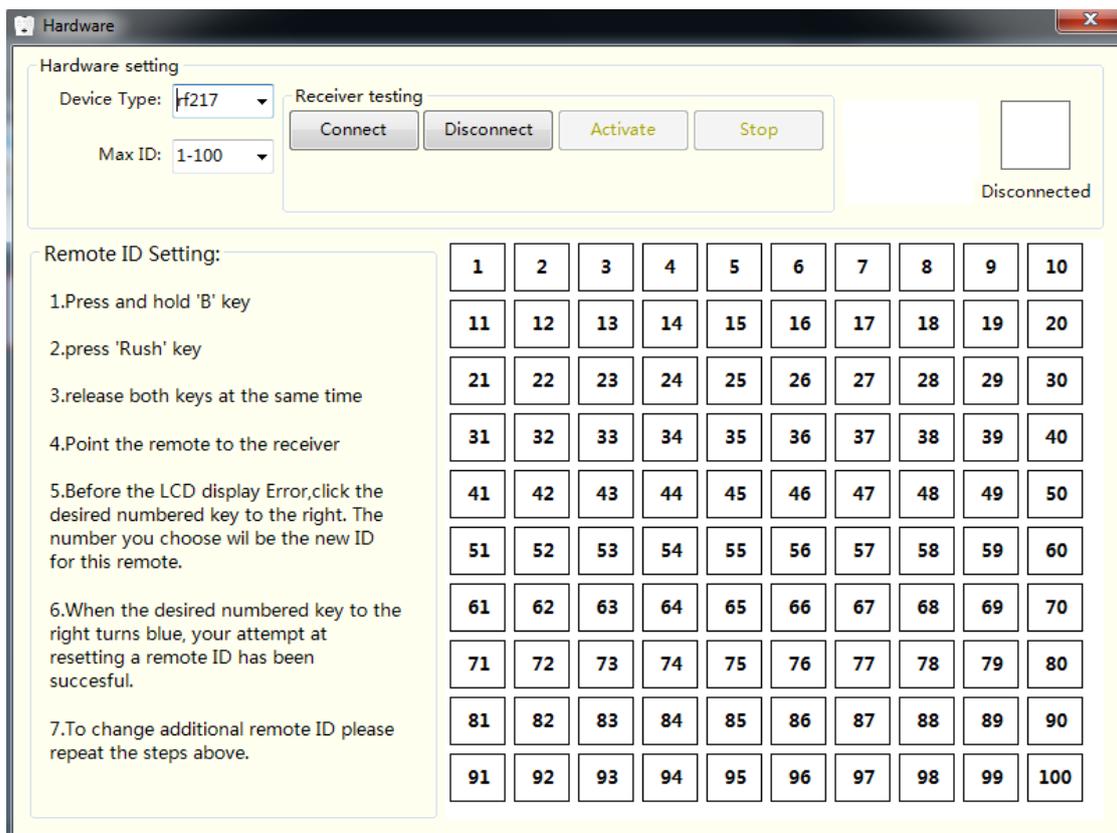

Vote based on given information

The right part is for acquisition, saving or clearing information.

If you use a preset template to create a question, the software will read the information automatically, otherwise you may need to read them manually.

After any operation on the left and middle side, the information will be automatically saved, generally no need to click the ok button again.

Hardware Setting

Device Type:

Select the hardware type to use

Max ID:

Select the ID range to test

Connect:

Connect the receiver. After the connection is successful, the frame on the right will turn red. Then you can check if the teacher machine works fine.

Disconnect:

Disconnect the receiver from the computer.

Activate:

Activate the receiver to test if the student remote works fine.

Stop:

Stop the receiver

Teacher Set:

Not supported by all types, hover the mouse over the button, follow the tip to set teacher remote.

Battery Check:

Only for RF215 buzzer, Detect the remaining battery of the connected buzzers

Remote ID Setting:

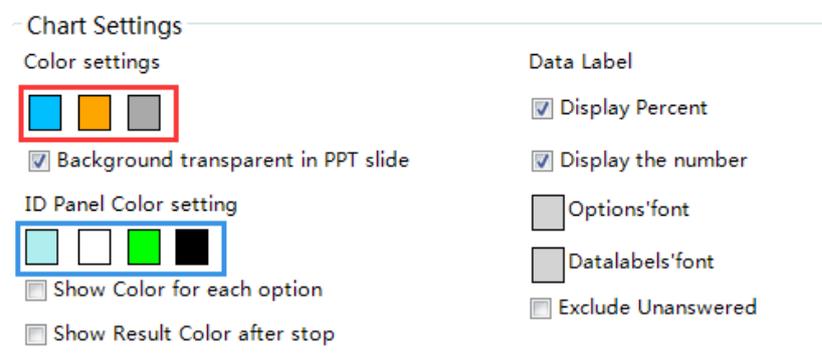

the way to set remote ID is different by different device type, please follow the tips on the left side

Settings

System configuration settings

At the top of the windows is language setting.

Chart settings

The settings in the red frame are: Columns'Color

Right Answers' Column Color

Invalid Columns'Color

Background transparent in PPT slide:

The column chart in the PPT page is transparent rather than white when enable

Display Percent :

The text box above the column chart will display when enable

Display the number :

The text box above the column chart will display when enable

Options and Datalabels' font:

Set the font and size of the column text in the PPT slide

The settings in the blue frame are: Color for Answered
Color for Not answered
Color for Right
Color for Wrong/Elimination

Show Color for each option:

When the quiz is completed, the background color of the ID will change to theselected option color.

Color for each option needs to be set in the PPT Edit window.

Show Result Color after stop:

After enabling it, When the quiz is completed, the color in the ID panel will change according to its result of each person.

Exclude Unanswered:

Data statistics after finishing the quiz will remove the unanswered when enable

Play settings

Play settings

<input checked="" type="checkbox"/> Show countdown	<input checked="" type="checkbox"/> Show Status bar

26	Gordon	26	2
27	Alice	27	1
28	Riply	28	2

Tips: Double click rowheader to select class, double click cell to edit class
Double click rowheader or drag mouse to select one or more students

You can Add, delete, and modify classes and students here, Double click on the cell to edit it, be sure to press the save button after editing, Setting for Teachers and subjects are in the same way.

Export an existing class list to excel:

Double-click the row header to select the class to be exported, click the button, select the save location, and wait for the export action to complete.

Import class list from Excel:

Edit the student list by using the template in advance, click the button to import

**** The class list template can be found in a folder named Class under the program directory.**

Query

The screenshot shows a web interface for querying data. At the top, there are three tabs: "Query by class", "Query by person", and "Query by activity". The "Query by class" tab is selected. Below the tabs, there are two main sections: "Query content" and "Query conditions".

Query content: This section contains four radio button options: "Class grade list" (which is selected), "Class answer details", "Single attendance details", and "Activities information summary".

Query conditions: This section contains several input fields: "Class" with a dropdown menu showing "Temporary class"; "Subject" with a dropdown menu showing "All"; and "Activity Time" with "From" and "To" date pickers. The "From" date is set to "2018/ 9/ 4" and the "To" date is set to "2019/ 5/ 8".

At the bottom center of the interface is a button labeled "Query".

1. Query by class

Class grade list: view the grade list of every activities, including student No, name, Group No, Score, Answer time, rank, class score, pass rate and fullmark rate.

Class answer details:

Single Attendance details: view the result of a single attendance, including attendance time, every students' status, the number of present and the number of absent.

Class activities summary: View activity information for a certain period of time, including activity number, activity name, activity mode, participation form, subject name, courseware path, teacher name, activity date, and number of participants

2. Query by person

Activity statistics: view the performance of all activities of a single student for a certain period of time, including activity information, individual scores, rankings, and class averages.

Student answer details: View details to a student in an activity.

Judge details: View the scores given to each of the judge objects in judge mode

Attendance details:

View attendance of a student over a period of time, including attendance time, , Times of present and absent.

3. Query by Activity

Question accuracy queue:View the statistics of each topic in a single event, answer and correct the mistakes, sort by the correct answer; help the teacher to understand which questions in the whole courseware are answered well, which questions are poorly answered.

Multiple-choice queue: View the detailed list of the wrong, unanswered and corrected questions for each question in a certain activity

Multiple-choice queue histogram: Query the statistics of the number of respondents in each question in the form of a "histogram"

Grade details: view the scores of each judge objects in a certain judge mode activity and the details of each judge's scoring

After selecting the appropriate query mode and setting the corresponding query conditions, click the Query button to view the result.

Extract

Click on the row header to select an activity, the Gridview down below will display the details of the selected activity.

Click the Export button to export the results to Excel

SpecialSlide Set

By using SpecialSlide Set, you can customize the display effect on PowerPoint slides

Currently supports these modes:

Position Report Slide: Show leader board by person or group, or Judge target Top list in Judge mode

Response Bar Slide: Display the details of each option to the question, the number of people who have answered, or Total score and average score of the Judge target in Judge mode

How to use: Use mouse to select a text box or shape in the slide, then you can set Different properties through the window.

Activity Modes Describe

(1).Normal Quiz:The Quiz with standardized multiple-choice and one right answer. Everyone can reply it in the same time.

(2).Rush Quiz: The first audience pressed "Rush Quiz" get the power to choose the right answer in stated time. If right, add score, wrong, subtract score.

(3).Elimination: The audience choosing the right answer can enter the next bout, the loser is restricted by system automatically.

(4).Vote, Inquiry: Questions with standardized multiple-choice and no right answer. Choose one from the candidates.

(5).Grade: Grade the object displayed. A- excellent, 10 points; B-all right, 8 points; C-pass, 6 points; D- not good, 4 points; E- bad, 2 points; F-worst, 0 point or enter the number 0~100 directly. The system will display the total scores of each object and the sort by total mark or average mark.

(6).Ad-lib Quiz: It is used for the quiz with only one right answer. It needn't slides prepared by using the Paper Editor. The instructor explains or describes (dictate or write on the blackboard or by other means) the questions and choices, and then press start. The audiences press the remotes to response. After the instructor pressed the "stop" button, the software will stop gathering information from the audience remotes, and ask the instructor to set the right choice and scores of the questions, and display the result and reports subsequently.

(7).Hand-raise: It is used for the quiz without standardized choice. The instructor displays the paper and press start, the audience who click the "Rush Quiz" first, gets the power to response. The instructor grades the audience according his/her response, adds score or deducts score.

(8).Rollcall: The participation mode is restricted to individual. After the instructor press "start", the Rollcall starts. When the instructor presses "stop", the Rollcall is over, the software will pop-up the roll book.

(9).Attendance: After the instructor press "start", the attendance starts, Students press one of the buttons from button A to H to sign up. When the instructor presses "stop", the Attendance is over, the system will pop up the result.

(10).Multi mode: In one activity multi mode such as Normal Quiz, Random Call, Hand-raise, Ad-lib Quiz and Feedback can be selected.
